LAL SINGH TOP SCORER IN TWO INNINGS

- London Apr. 30. The Ali-India XI commenced their England tour yesterday with a match at Pelsham against Mr. Scott's XI. When the game was resumed to-

day, Mr. Scott's XI were dismissed for 157 runs. Ghulam Mohamed was in great form with the ball, and claimed six wickets for 42 runs. Lal Singh was again top-scorer for the tourists, the second innings realising 104 runs for nine wickets when a declaration was made. He scored 47. This left Mr. Scott's XI very little

time to make the required runs for victory. They made an attempt to 7 do so, and when stumps were drawn had lost five wickets for 52 runs. 4 The match was therefore left drawn. \_Renter.

#### AND K.R.A.

Sir,-Mr. M. K. Lo's letter in support of Dr. Li Shu-fan's candidature in the forthcoming Sanitary Board election will doubtless have been carefully considered by your renders, and I do not doubt that the "impartiality and characteristic good sense of the public" wil. already have led them to assess the arguments set forth therein at

#### K. R. A. POLICY.

The activities of the Association since its inception bear witness to its general policy, which has always been to give due thought to all questions of public interest affecting the Colony as a whole, flow closely this policy has been adhered to an examination of its published records will show.

We have consistently declined to act in the interests of any section or party at any time where such interests would conflict with the public weal. Our primary interests are, naturally those of the Peninsula, but there can be no doubt that these are closely linked with the general welfare of the Colony.

COMPARATIVE MERITS. Mr. Lo, while protesting that he is not concerned with the comparative merits of the rival candidates. stresses at length the peculiar qualifications of Dr. Li for the vacant seat. The K. R. A. on the other hand wishes to point out that in addition to his long residence in the Colony and intimate knowledge of its requirements health point view. Mr. Mow Fung has the further advantage, by reason of his connexion with the Association as a member of the Committee, of the technical and medical knowledge represented by that Committee, It makes no suggestion that the Association is the only channel by means of which health matters affecting residents can be ventilated on the Sanitary Board, nor is there the least ground for the imputation that the Association wishes to reflect on the actions of Mr. Lo. or any other member of the Board. I fail therefore to see that the statement of which Mr. Lo complains is any more "unfair" than is Mr. Lo's own emphasis on the peculiar advantage of his candidate.

#### NOTABLE RECORD.

The Association has every confidence in putting forward Mr. Mow Fung as a suitable candidate for the sent. In addition to his personal qualities he has a notable record of public service; he has p stated his views and attitude with characteristic clearness and frankness, and we believe that his election will be unquestionably in the general interest of the Colony as a

The attempt of London's May Day demonstrators to reach the Japanese Embassy to protest against Japanese policy in the Far East led to a fierce struggle.

The demonstrators, when warned that they would not be allowed to proceed into Portman Square, began to throw stones at the police, who on foot and mounted, charged the mob with their batons drawn.

Many encores were insistently requested by the public who were unanimous in affirming that the new band of the Peninsula is certainly the very best one in the Colony.

Peter Lleweyn Davies, the young publisher, godson and ward of Sir James Barrie, and the original of "Peter Pan," became a bridegroom in London the other day. He is shown here after the coremony with his wife, who was the Honorable Margaret Hore-Ruthven, one of the socially prominent Ruthven twins and daughter of the Governor of Guernsey. Barrie's immortal children's story, "Peter Pan," was dedicated to Peter Davies and his brothers, orphans who became the wards of the author.

#### PRACTICAL EDUCATION

Among the problems which Hongkong has to face is that of evolving a system of education which shall be of practical use to young lads when they go ou into life and seek to earn their living in the industrial sphere. Not only in this Colony, but in Britain as well, it has long been realised that some substitute needed for the old-time appreticeship system. Accordingly, many admirable educational schemes Have been drawn up and put into successful operation in Englland by several members firms of the Association for Education in Industry and Commerce, but these efforts, worthy of praise as they undoubtedly are, touch merely the fringe of the problem, which can be properly tackled only by a

scheme on a larger scale than is possible to a single firm or group of firms. Some time back, the Association named above, in discussing at its annual conference the education system of Great Britain, especially in relation to business needs, could pass no judgment upon the graduates, though it noted as a a man who has followed a course he rests his imputations should of academic reading will have be shown to have no substance thereby acquired a method of at- either in theory or in fact. tack and a system of study readily applicable to any and every kind of business problem. That this theory is substantially sound is indicated in a statement of Sir

Such an educational system, however, though at its best yielding the highest possible results, is not suited to all types of ability. From both a commercial and a cultural point of view there is much to be said for the contention of Sir Charles Grant Robertson that it profits only those students who are reasonably Wharf. likely to attain first, or second class honours in their degree

The question thus arises—and it is one which greatly concerns Hongkong-as to what kind of education is to be given to those who either do not satisfy this requirement of who do not wish to enter a university. It is in dealing with this huge army of young that British education is recourse, for those who do not conobserved some time ago. Mr. Lo bases his criticism on the Association's statement that "the expert technical and medical knowledge at the command of the Association will also be at the disposal of dur candidate." As we view the matter. there is no justification whatever for investing this statement of fact with any ulterior meaning, such as the implication that the Association might withhold its advice from any member of the Board not nominated by the K.R.A. The issue is, after all, quite simple. There are two candidates for the seat, one with medical and public health qualifications; the other laying no claim to the possession of such technical knowledge. To offset any apparent handicap under which the latter may appear to be labouring, the Association quite properly stresses his official connexion with a body which has access to expert advice. There is no suggestion that the Association's candidate has exclusive contact with that' body, but it is made clear that any seeming disability created by the fact that Mr. Mow Fung is la layman is, in the circumstances, more apparent than real-in other words, that what he may lack In expert knowledge is countercommercial success of university balanced by the fact that he lean look to the Association's exsignificant fact that the appoint- perts for guidance. #### LAL SINGH TOP SCORER IN TWO INNINGS

London Apr. 30.

The All-India XI commenced their England tour yesterday with a match at Pelsham against Mr. Scott's XI.

When the game was resumed today, Mr. Scott's XI were dismissed for 157 runs. Ghulam Mohamed was in great form with the ball, and claimed six wickets for 42 runs.

Lal Singh was again top-scorer for the tourists, the second innings realising 104 runs for nine wickets when a declaration was made. He scored 47.

This left Mr. Scott's XI very little time to make the required runs for

victory. They made an attempt to 7 do so, and when stumps were drawn 1 had lost five wickets for 52 runs. 4 The match was therefore left drawn. -Reuter.

I was responsible for the following and proper sanitary precautions, then it is the duty of the Health Authorities to instruct residents as to what constitutes ordinary care, and to provide the necessary sanitary precautions.

I am therefore wholeheartedly in favour of health propaganda conducted regularly and systematically, with the object of gulding the public in health matters, and especially of educating the lower classes in the rudiments of sanitary living in the hope of obtaining their co-operation. I would stress the necessity for this, as however stringent ordinances and by-laws may be, the officers to enforce them cannot be present everywhere. At any rate I am in favour of intelligent education rather than stringent regulation.

It is the co-operation of masses that we need in order abolish the wide-spread evil dumping of dead bodies, to prevail on the people to surrender the privilege of exemption from registration of deaths in the New Terdiseases, and to submit to isolation with proper amenities.

It is primarily the poor and ignorant that we have to deal with, because no health measure is effective without their co-operation; because it is ultimately through them that it is determined whether epidemics will arise, and whether the better homes will have to bear the onslaught of infection. In short, the standard of health prevailing in the slum tenements in the back streets of Hongkong will be the of health of the Colony.

Sanitary Board Election

[To the Editor, Hongkong Telegraph.]

> It is undoubtedly the constitutional duty and privilege of the two elected members of the Sanitary Board to represent the interests of the Colony as a whole, but I submit that it is neither unconstitutional nor undesirable for one or both of them to give special attention to the needs and problems of a particular district of the Colony, especially when that district is of such increasing size and importance as Kowloon, which at present comprises nearly 43% of the total population. True, I have had the honour of being nominated by the Kowloon Residents' Association and I shall unequivocally adhere to my purpose to pay particular attention to Kowloon matters, but I maintain that the interests of Kowloon are so bound up with the general welfare of the Colony, especially as regards health problems, that it is impossible to imagine any situation where there would be a conflict of interests.
